IN THE CLAIMS

Please amend the claims to read as indicated herein.

1. (currently amended) A method of augmenting a set of image recordings, comprising:
recording, in association with taking an image recording of said set of image recordings
using a camera, ~~recording corresponding taken image recording location first data~~
indicative of ~~the~~ a geographic locations where the image recordings were taken, and
location of said camera;
~~recording desired image recording location separately from taking said image recording,~~
second data indicative of ~~at least one a~~ geographic location of said camera ~~for which a~~
user of the camera desires an, or a further, image recording; and
subsequently augmenting said set by using the desired image recording location said
second data to retrieve ~~one or more image recordings, from a resource separate from~~
said camera, an image recording concerning the at least one said geographic location
indicated by ~~the desired image recording location said second~~ data.
2. (currently amended) A camera according to claim 1, wherein ~~the location said first~~ data
is recorded in a recording arrangement that is separate from ~~the said camera used to record the~~
~~image recordings.~~
3. (currently amended) A method according to claim 2, wherein ~~the taken image recording~~
~~location data and the desired image recording location said first data and said second~~ data are
recorded in ~~the~~ a same sequence of data items.
4. (currently amended) A method according to claim 1, wherein ~~the location said first~~ data
is recorded in ~~the said camera used to record the image recordings.~~
5. (currently amended) A method according to claim 4, wherein ~~the taken image recording~~
~~location data and the desired image recording location said first data and said second~~ data are
recorded in ~~the~~ a same sequence of data items.

Art Unit: 2623

6. (currently amended) A method according to claim 1, wherein ~~the subsequent retrieval of image recordings corresponding to the desired image recording location data involves said retrieving comprises~~ retrieving multiple image recordings ~~for said desired image recording location second data~~, displaying ~~the retrieved~~ said multiple image recordings to the user, and enabling ~~the~~ a user to choose ~~one of the retrieved~~ at least one of said multiple image recordings for retention and association with ~~the taken~~ said set of image recordings.

7. (currently amended) A method according to claim 1, wherein ~~the subsequent retrieval of image recordings corresponding to the desired image recording location data~~ said retrieving comprises displaying ~~to the user~~ a map of an area around ~~said desired image recording~~ said geographic location indicated by said second data and obtaining ~~user~~ an input detailing a target subject, zone or point ~~for which an image recording is desired~~, and using ~~said user~~ input to facilitate ~~retrieval of said desired image recording~~ said retrieving.

8. (currently amended) A method according to claim 1, wherein subsequent to said taking of said set of image recordings, ~~the user is presented with a map display showing a map display shows~~ locations where image recordings of said set were taken, and wherein, prior to ~~retrieval of an image recording corresponding to a particular item of said desired image location data~~, ~~the location represented by that item is indicated on the said map display when presented~~ said retrieving, an item is represented on said map display, and wherein said item corresponds to said geographic location indicated by said second data.

9. (currently amended) A method according to claim 8, wherein when ~~the~~ said map display is present, retrieval of an image recording corresponding to ~~said particular item~~ is initiated by clicking on a displayed graphic element associated with ~~the~~ a displayed location corresponding to ~~that~~ said item.

10. (currently amended) A method according to claim 1, wherein ~~the subsequent retrieval of image recordings corresponding to the desired image recording location data involves said~~
